

Fig. 3. Transversal intensity distribution of the field formed by axicon with blunt profile with $a = 3 \mu\text{m}$ (black curve), $a = 5 \mu\text{m}$ (red curve), $a = 8 \mu\text{m}$ (blue curve). Parameters: $\lambda = 532 \text{ nm}$; $R = 1.77 \text{ cm}$; $n = 1.4657$; $\alpha = 2^\circ$; $w_1 = 2 \text{ mm}$; $z = 45 \text{ cm}$
